ABOUT

Product-minded Frontend Engineer with **6+ years** of experience building complex web products in **startups** and **large-scale companies**. Strong in **0→1** development, **data-heavy** interfaces, frontend architecture, performance, testing, and building a good developer experience.

Comfortable working directly with founders, designers, and backend engineers to shape requirements, ship fast, and own delivery **end-to-end**. Use **AI coding tools** as part of the daily workflow to move faster, iterate quicker, and keep implementation quality high.

SKILLS

Frontend: JavaScript, TypeScript, React, React Native, Next.js, Electron, Solid, TanStack Start, Redux Toolkit, RTK Query, React Query, Zustand, MobX, Tailwind, CSS Modules, PostCSS, MUI, Storybook, Jest/Vitest, React Testing Library, Playwright, Vite, Webpack Module Federation, TurboRepo, pnpm, bun

Other: Node.js, Codex, Claude Code, Docker, GitHub CI / CD, Python, SQL, web3

EXPERIENCE

NEX: 01/2025 - PRESENT

*Nex unifies **real-time customer data & conversations** into an **intelligent context layer**, with **AI-powered APIs** to access that context from anywhere.*

- Owned frontend from **0→1** in a **5-person** founding team, working closely with the CEO, CTO, designer, and backend engineer to turn early ideas into shipped product flows.
- Built an **offline-first** canvas-based CRM schema builder for custom entities and relationships, with **3-way merge** logic across local state, server data, and AI suggestions via **SSE**.
- Led the full app migration from **React SPA** to **TanStack Start**, rebuilding the architecture around **BFF**, implementing **WorkOS** auth **end-to-end**, and adding full-stack **Sentry** and **PostHog**.

Technologies: React 19, TanStack Start, React Flow, Zustand, SSE, WorkOS, Sentry, PostHog

OTP BANK: 11/2023 - 01/2025, 1.3 YEARS

A web application for corporate banking clients.

- Launched the app MVP within **5 months**, enabling the bank to onboard new customers **2 months ahead of schedule** and increase early adoption by **19%**.
- Developed **7 key features**, including Swift transfers, non-resident transfers, deposits, currency conversion, counterparties, and user profile. These features enabled the bank to expand its services to **68% more customers**.
- Optimized the build process, reducing build time by **36%**, which led to faster release cycles, enabling quicker delivery of new features and bug fixes.

Technologies: React, Next.js, TypeScript/JavaScript, RTK Query, Redux Toolkit, MUI, Webpack Module Federation, Keycloak, React Hook Form

ALFA BANK: 10/2022 - 11/2023, 1.2 YEARS

*A retail bank for individuals with **~10M daily active users**.*

- Upgraded the Server-Driven UI (**SDUI**) technology with dynamic form capabilities, supporting **10 condition types** and **21 input types**, allowing forms to adjust automatically based on user input.
- Achieved **90% test coverage** of our SDUI components library using **Jest** and **RTL**, enabling safer deployment of new features.
- Created an internal **VS Code extension** that helped around **50 frontend engineers** write SDUI contracts faster and with fewer configuration errors.

Technologies: React, TypeScript/JavaScript, WebView, Redux Toolkit, React Query, Playwright, Jest, React Testing Library, Node.js

EPAM: 03/2020 - 10/2022, 2.8 YEARS

Worked on 13 very different client apps, from stock trading to baby feeding tracking.

Technologies: React Native, React, TypeScript/JavaScript, WebSocket, Fastlane, Redux Toolkit, Firebase, Notifications (Notifee), Web Workers

EDUCATION

COLLEGE KOLOMNA - 2019 - 2023

Information Technology
