EXPERIENCE

NEX (YC S26) | Founding Frontend Engineer — 02/2025 - 05/2026

- Fully responsible for the frontend in a **5-person founding team**, working closely with the CEO, CTO, designer, and backend engineer to turn early ideas into shipped product flows.
- Built an **offline-first** canvas-based CRM schema builder for custom entities and relationships, with **3-way merge** logic across local state, server data, and AI suggestions via SSE.
- Led the full app migration from React SPA to **TanStack Start**, rebuilding the architecture around BFF, implementing WorkOS auth end to end, and adding full-stack Sentry and PostHog.
- Integrated AI-powered code review workflow combining **Claude Code** for intelligent code generation and **SonarQube**, catching **70% more edge cases**.

Technologies: **React 19**, **TypeScript**, **TanStack Start**, TanStack Query, React Flow, TanStack Table, Zustand, SSE, Node.js BFF, WorkOS, Sentry, PostHog, Claude Code, SonarQube, Vite, pnpm

ZAPIER | Senior Software Engineer — 02/2023 - 02/2025

- Developed frontend features for no-code AI chatbot experiences connected to automation workflows, data sources, and configurable business logic.
- Introduced **Tailwind CSS** for published page styling and headless, compositional **React** component patterns.
- Optimized the frontend build pipeline, reducing build time by **36%** and shortening feedback loops for feature delivery, QA, and bug fixes.

Technologies: **React**, **TypeScript**, JavaScript, **Tailwind CSS**, Zustand, headless React components, Vite, Webpack, API state, CI/CD

DEEL | Senior Software Engineer — 10/2021 - 02/2023

- Improved **LCP by 27% (~760ms)** across key product pages by reducing initial JavaScript, lazy-loading non-critical routes, and deferring secondary API calls until after the first render.
- Built a chunked media-upload pipeline, reducing large-file upload time by **68%** and improving reliability for users on unstable network connections.
- Served as an on-call engineer for production client apps, reducing average response time for customer-reported bugs to **under 4 hours**.

Technologies: **React Native**, **React**, **TypeScript**, Redux Toolkit, WebSocket, Firebase, Fastlane, Notifee, Web Workers, CI/CD

ALFA BANK | Senior Frontend Developer — 03/2019 - 02/2022

- Upgraded the **Server-Driven UI** (SDUI) technology with dynamic form capabilities, supporting **10 condition types** and **21 input types**, allowing forms to adjust automatically based on user input.
- Achieved **90% test coverage** of our SDUI components library using Jest and RTL, enabling safer deployment of new features.
- Created an internal VS Code extension that helped around **50 frontend engineers** write SDUI contracts faster and with fewer configuration errors.

Technologies: **React**, **TypeScript**, Server-Driven UI, Redux Toolkit, React Query, WebView, Jest, React Testing Library, Playwright, Storybook, Node.js, VS Code Extension API

EDUCATION

Moscow Polytechnic University · Bachelor Degree · Information Technology · 2018 - 2022
